

AHMAD ABURAS

Software Engineer

☎ 0523125225 ✉ ahmadras307@gmail.com [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

B.Sc. Digital Sciences for High-Tech graduate from Tel Aviv University with a strong foundation in Python, C, SQL, Machine Learning, Data Structures, Algorithms, Data Analysis, and Software Development. Hands-on experience developing machine learning projects, data-driven applications, and modern web platforms, including frontend development with HTML, CSS, JavaScript, and UI/UX principles.

Completed Harvard CS50, Google Cloud's Introduction to Generative AI, and Great Learning's Vibe Coding with AI Tools programs. Passionate about problem solving, continuous learning, and building impactful technology solutions.

EDUCATION

B.Sc. in Digital Sciences for High-Tech

[Tel Aviv University](#)

2021–2025

B.A. in Health Systems Management (Honors)

[The Academic College of Law and Science](#)

PROJECTS

[HELP ME – Service Booking Platform](#)

- Developed a responsive frontend web platform connecting users with verified service providers.
- Simulated real-world booking and payment user flows with focus on intuitive UI/UX
- Implemented smart filtering and sorting based on ratings, price, distance, and expertise

[Job Acceptance Prediction System](#)

- Built end-to-end ML pipeline including data cleaning and preprocessing, feature engineering, and model selection
- Trained and optimized Random Forest, AdaBoost, Logistic Regression, and KNN models using Scikit-learn
- Achieved high validation AUC with minimized overfitting through cross-validation

SKILLS

[Programming Languages](#): Python, C

[Software Engineering](#): OOP, Data Structures, Algorithms, Operating Systems, Software Development

[Data & Machine Learning](#): Machine Learning (ML) , Data Analysis, Scikit-Learn, Feature Engineering, Data Preprocessing, Machine Learning Pipelines.

[Databases](#): SQL, PostgreSQL, SQL Server, DBMS, Information Systems, Databases

[Web & Backend](#): HTML, CSS, JS, UX/UI, HCI, REST APIs, FastAPI, Git, GitHub

[AI & Automation](#): Generative AI, Prompt Engineering, LLM Applications (ChatGPT, Claude, Cursor AI, Gemini, Antigravity), AI-Assisted Development, n8n

[Systems & Tools](#): Linux, Docker, Vercel

TRAINING / COURSES

CS50x – Introduction to Computer Science
[Harvard University](#)

Introduction to Generative AI
[Google Cloud](#)

Learn Vibe Coding with AI Tools
[Great Learning](#)
